What is a Business Model?

Rules of the game for creating and capturing value

Based on a validated set of beliefs about the business

Shared assumptions on aspects such as:

- customer preferences
- role of technology
- regulation
- cost drivers
- basis of competition and differentiation

WHO their customer is – In terms of:

- Motivations
- Expected advantages

WHAT they sell to them – In terms of:

- Products & Services
- Value that these products/services create

HOW they do business – In terms of the means by which :

- the “what” will be created and provided to the “who”

NETFLIX RESEARCH

Netflix: A Culture of Learning

- Machine learning
- Recommendations
- Experimentation and causal inference
- Analytics
- Encoding and quality
- Computer vision

Image Personalization for Viewers — Netflix uses artificial intelligence and machine learning to predict which images best engage which viewers as they scroll through the company's many thousands of titles.

AVA: Creating Appropriate Thumbnail Images — Netflix has created AVA to source stills from its many thousands of titles that will eventually become the representative images that the company uses to drive viewer engagement.

Mission

The goal of Peerby is quite simple: provide a user-friendly online platform where people can lend or borrow articles for free with people from the neighborhood.

Vision

Make people aware to use their goods in a more sustainable and ecological manner. Peerby tries to lower the superfluous expenses of people, by giving them the means to share in an easy way.

They also try to convince the inhabitants of the Netherlands and Belgium to not hold on to possession, but to navigate to the use of a product. Peerby tries to pull producers over the line to produce products for use instead of products for possession. They also want to keep the platform free, since the platform is a common good.

Values

Sustainable, ecological, economic and social. The main focus lies on the social aspect.
